Status Report

25 OCTOBER 2021

Name

Nanayaw Boakye

Previous Goals

- Learning how to wireframe and creating at least a model of the homepage for the project
- Learning about what ethical considerations we have for the project
- Once wireframe is done, begin the basic HTML view and push to repository
- Communicate more with team members

Oct. 18 - 24 Progress

- This week I completed some wireframes for how the homepage of our site will look and I also completed the wireframe of how the detail of a question will look like. I also considered some ethical concerns for my project this week. Everything went well here.

- I learned a couple of things about security for applications from the textbook but I also learned more about what ethics in computer science means.

- I had some trouble with understanding all the security concepts in the book.

Plans and Goals for Oct. 25 - 31

- Once wireframe is done, begin the basic HTML view and push to repository
- Learn more about how to use flask for navigation
- Create a data flow diagram for our project
- Complete the status reports
